

Weekly Report

05/10/2015-05/17/2015

Research

This week, I make a report about user profile. User profile was used to connect user with designer. Driven by big data, user profile is important to advertise recommendation, behavior prediction and anomaly detection. Besides, I have made a ppt for my defense at next tuesday morning.

I find a pattern of our storyline project. As showed in Fig.[?], the patten in blue circle means people with low entropy, I think they are staying at home or work place. The other pattens indicate that people are always moving. In my surmise, It is a case about drivers(or someone else) to and from work.

Plan for next week

- Read the book 《数据可视化》 and prepare a presentation.
- Read "Statistical learning methods"
- Prepare for graduate paper defense
